## Based on the information from the text choose the correct answer and circle the letter in front of it:

The climate has changed so the planet is getting warmer. People have destroyed large areas of the rainforests and damaged the oceans. Pollution in big cities has got worse. The number of endangered species has also increased. When you switch on the television or open a newspaper, you can usually find stories about the environment destruction.

Most people think that there is nothing they can do, but this is not true. We can all do something to help our local environment. In many towns, places have opened where you can recycle glass, paper, cans and plastic and, in some places, they collect paper and glass from your house.

When you go to school or to the local supermarket, you can walk or take the bus instead of travelling by car. Public transport is better for the environment. You can turn off the lights when you go out of a room and turn off the television or computer when you have finished. You can save water too. Turn it off when you clean your teeth and don't stand under the shower for ten minutes! These are small things, but if everyone does them, then there will be some change.

There are 'green' organizations all over the world. If there's a local group in your place, why don't you join it? And if there isn't a local group, why don't you start one? Think about that.
